

AYUCID-8 ^{New}

High potency water acidifier

- Ideal blend of 8 acids
- Fortified with ELEMENTAL COPPER
- Dissociated part of acids brings down the pH
- Undissociated part kills pathogens

PACKING : 1ltr. 5 ltrs. & 50 ltrs.

COMPOSITION :

- Propionic acid
- Acetic acid
- Citric acid
- Sodium disulphate
- Hexamine
- Butyric acid
- Lactic acid
- Formic acid
- Orthophosphoric acid
- Min. 4 % elemental copper

ADVANTAGES :

- Bring down pH of water to 4 while using only acidifier as sanitizer.
- The best result of chlorine or NADCC tablet is achieved when pH of water is 5-5.5, because at this pH all chlorine is converted into HOCL (hypochlorous acid)
- Antimicrobial activity of chlorine is only to HOCL.

BENEFITS :

- Effectively reduces pH of water resulting in control of broad range of pathogenic organisms.
- Controls multiplication of pathogenic bacteria
- Enhances convergen of chorine to hypochlorous acid
- Helps in descaling of pipe lines
- Reduces blockage and nipple chocking
- Improve early protein digestion (Bio gastric protiolysis)
- Provides second layer of protection in crop
- Increase water consumption
- Helps in improving intestinal health
- Firmer dropping

DOSAGE :

In Broilers, Layers & Breeders :

Drinking water : 2-4 ml / 10 Lit. of water to bring down pH to 4
MBM / Fishmeal / Raw material : 3 kg / ton of feed
