

MAXI-NUTRA

High Performance 0.5% Premix

Do What is Right for the birds instead of What is Popular

How to get Maximum Performance and Higher ROI

Quality Nutrients:

- Providing birds with high quality nutrients, vitamins, minerals and growth supplements as per their requirement standards.

Gut Health:

- Ensuring better "Gut Health". Gut it is the main organ responsible for digestion, absorption and immunity.

Liver Health:

- Ensuring better liver health. Liver it is one of the main organ responsible for metabolism, nutrient detoxification, immunity development and egg formation.

Immunity:

- Ensuring better immunity & increases their livability.

Reduces Feed Cost:

- Providing the best quality enzymes to get maximum output from feed, reducing feed cost & to take care of anti-nutritional factors in feed.

Maxi-Nutra: Scientifically Formulated 0.5% Premix

- It is ultimate choice to achieve their maximum performance by virtue of
 - Better growth & FCR
 - Higher production, better egg shell quality
 - Reduces general mortality
- It provides best quality supplements required by birds in one single pack.
- Ensures convenience of usage.

Maxi-Nutra: Objectives and Benefits:

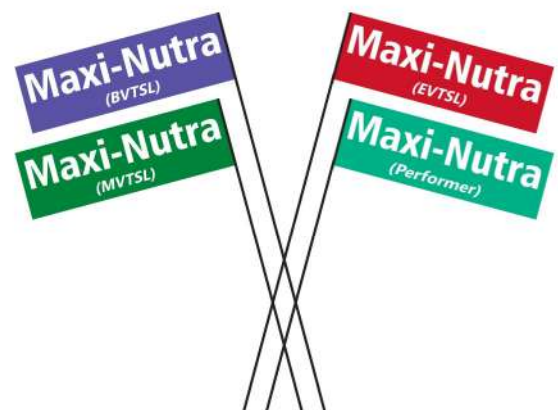

- To improve overall performance of layers & broilers.
- To improve production, F.C.R. & better egg shell quality.
- To ensure better gut health & strong immune system.
- To reduce loose droppings & dirty egg issues.
- To provide best quality supplements required by birds in one single pack.
- To ensure precise dosing of additives & to minimize mixing error.
- To reduce number of suppliers & inventory cost.
- To ensure homogenous mixing of supplements in feed.

Composition :

- Vitamin Premix
- Trace minerals - Inorganic trace minerals (top upped with organic trace minerals)
- Toxin binder • Antioxidants
- **Liver protector :**
- Liver tonic (Combination of synthetic liver stimulants + Herbal extract)
- Choline Chloride 60%
- **Enzymes :**
- Phytase+ NSP Enzymes+Protease (From Bioproton, Australia)
- **Gut health protector & immuno-modulator :**
- Probiotic (From Bioproton, Australia)
- Non-Antibiotic- Antimicrobial compound
- Garlic extract • UGF • Tributyrin
- Enzymatically digested yeast (MOS + Mannase + β - Glucans + Redefined functional carbohydrate)

Benefits of using Maxi-Nutra

- Improves overall performance of birds and higher ROI.
- Improves production, F.C.R. and better egg shell quality.
- Ensures better gut health and strong immune system.
- Reduces loose dropping and dirty eggs issues.
- Increases convenience and minimises mixing errors by providing precise quantities of additives in one single pack.
