

MYCOTILIN-10%

For CRD in Poultry

Mycotillin-10% is a Tiamulin Hydrogen Fumarate of consistent, high quality & global standard.

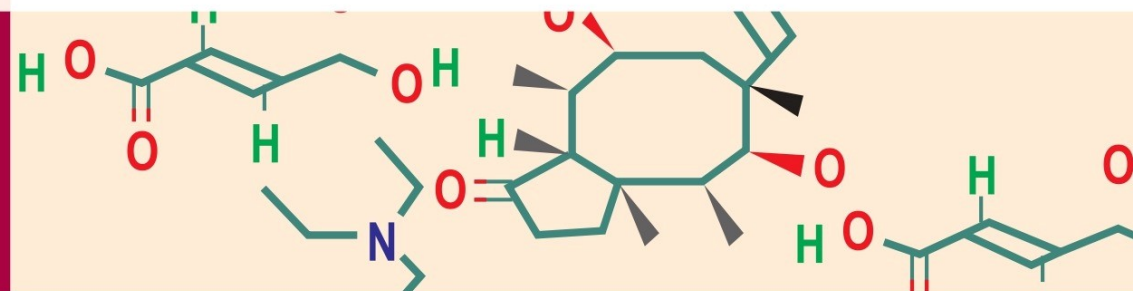

The API (Active Pharmaceutical Ingredients) for Mycotillin is imported from the research based company, which is the largest producer of Tiamulin Hydrogen Fumarate.

The company & plant facility is approved by European union, USFDA, Australian GMP.

MYCOTILIN 10% assures consistent quality of world standards.

PACKING : 25 kg

COMPOSITION : Each gram contains
Tiamulin Hydrogen Fumarate.....10%

MODE OF ACTION :

Tiamulin disturb the protein synthesis of mycoplasma organism. It blocks the initiation of polypeptide chain formation thereby prevents the synthesis of key enzymes & proteins. This result in control of microplasma.

INDICATION :

- For prevention & treatment of Chronic respiratory disease (CRD) caused by M.gallisepticum.
- Prevention of airsacculities & infectious synovitis caused by Mycoplasma synovia.

BENEFITS :

Broilers :

Improves F.C.R., Improves weight gain, Reduces mortality.

Layers :

Reduced mortality, Reduced egg breakage, Increase egg production & thereby resulting in better hen house production.

Breeders :

Improves hatchability, better chick quality, Improves chick survivability, Improves egg production, Reduced mortality.

DOSAGE :

Broiler	:	250 - 400 gm per ton of feed
Layer	:	350-500 gm per ton of feed
Breeder	:	500 gm per ton of feed
