

NEO BETAINE

Fortified Betaine to Maximize Performance

Neo Betaine- Most efficient Methyl Donor & Osmolyte

PACKING : 25 kg

COMPOSITION OF NEO BETAINE:

- Betaine Hcl
- Alpha-D-Lactose
- Folic acid
- Co-factors
- Gut modulators
- Zinc glycinate

IMPORTANCE OF METHYL GROUP FOR BETTER PERFORMANCE:

- Poultry is in constant need of Methyl group.
- Requirement of Methyl group increases when birds are under stress (Heat stress, Clinical and Subclinical Pathological stress).
- They are required in more than 200 biochemical reactions in birds.
- They are required in synthesis of many essential molecules like Methionine, Creatinine, Carnitine, RNA, DNA, Hormones, Phosphoglycerates, Immunity, etc.
- Protein biosynthesis and muscle development.
- Liver detoxification.
- Cell replication.
- Reduces protein degradation.
- Reduces cellular degradation of eggs.

DOSAGE:

500 gm to 1 kg/ton of feed
