Natural Relief for Chronic Respiratory Disease in Poultry (CRD)

CRD is a mixed, complex situation where Mycoplasma is the major primary cause and gets complicated by mixed co-infection with pathogenic respiratory viruses and pathogenic bacteria.

This causes heavy economic losses due to increased mortality and reduced performance in Broilers, Layers & Breeders.

COMPOSITION OF RESPO-KAVACH :

RESPO-KAVACH is specifically designed, advanced, super refined blend of potent, natural herbs:

Curcuma longa
Piperine
Euphrasia
Allium cepa
Hepar sulph
Tinospora cordifolia
Ocimum sanctum

ADVANTAGES OF RESPO-KAVACH :

- RESPO-KAVACH Kill helps in healthy respiratory function.
- Reduces inflammation & mucous built up.
- Clears mucous & stops respiratory sounds.
- Reduces bad effects of all causative organisms and effects of infection.
- Strengthening the immune system of birds.
- Helps in reducing mortality and maintaining maximum performance by minimizing impact of respiratory diseases.

RESPO-KAVACH is ideal for both Preventive care & Therapeutic treatment.

BENEFITS OF RESPO-KAVACH :

Broilers:

Improves FCR, Improves weight gain, Reduces mortality

Layers:

Reduced mortality, Reduced egg breakage, Increase egg production & thereby resulting in better hen house production.

Breeders:

Improves hatchability, better chick quality, Improves chick survivability, Improves egg production, Reduced mortality

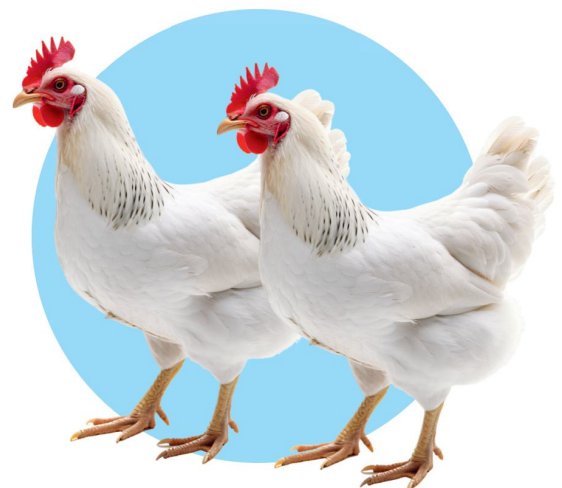

DOSAGE :

DURING INFECTION:

- On onset of respiratory sound and during infection:
100 gm/1000 birds per day
- As an aid along with antibiotic treatment
100 gm/1000 birds per day in drinking water
OR
1 kg / ton of feed or as directed by veterinarian

PREVENTION PROGRAM :

500 gm / ton of feed or as directed by veterinarian

PACKING : 5 kg.
