

TOCO-C FORTE

Potent formulation to improve immunity and performance of Poultry

Newly
Launched

MODE OF ACTION:

- Improves development of all immune organs.
- Strengthens the immune system by improving humoral and cell mediated immunity.
- Acts as a potent antioxidant to neutralizes free radicals which kills healthy cells.
- Reduces viral replication.
- Inhibits viral adsorption & penetration into healthy cells which reduces viral load.
- Reduces inflammation caused by various stressors and infections.
- Prevents bacterial and viral infection.
- Combats climate & vaccination stress.
- Improves antibody productions.
- Reduces immunosuppression.

COMPOSITION:

Each Kg Contains:

Vit E	100 gm
Vit C	200 gm
Citric acid	100 gm
Selenium glycinate.....	1 gm
Zinc glycinate	25 gm
Chromium glycinate	2 gm
Biotin	1 gm
Mix of Phytogenic compound as carrier	Q.S.
(Fortified with Essential oils)	

HIGHLIGHTS OF TOCO-C FORTE:

Advantages of adding Citric Acid:

- It enhances antioxidant effectiveness of Vitamin C and Vitamin E.
- It improves stability of both the vitamins.
- It improves gut health and microbial control.

Advantages of adding Glycinates of Selenium, Zinc and Chromium:

- It provides them in highly bioavailable form.
- They all improve cellular and humoral immunity.
- Provides synergistic effect with Vitamin E and Vitamin C.
- They provide antioxidant and antistress effect.
- Improves performance in broiler, layers and breeders.

Advantages of adding Mix of Phytogenic compound:

- Provides immunomodulatory effect (enhances T cell activity)
- Supports ovarian function, follicle development & estrogen production.
- Improves egg production, quality and weight of eggs.
- Improves weight gain & FCR
- Acts as Liver and Kidney tonic helps in developments of immune organs and boosting immunity
- Reduces viral replication.
- Inhibits viral adsorption & penetration into healthy cells which reduces viral load.

Advantages of adding essential oils:

- They provide antimicrobial, antioxidant, anti-inflammatory and immunomodulatory effects.

BENEFITS:

- It boosts immunity and antioxidants status.
- Reduces incidents and impacts of diseases.
- Reduces mortality.
- Improves growth and performance in broilers.
- Enhances eggs production in layers.
- Improves breeder performance and hatchability.

DOSAGE:

Broilers/Layers: 250-500 gm/ton of feed

Breeders: 500 gm to 1 kg/ton of feed

PACKING : 5 kg
