

TOXI-SHIELD FORTE

A unique formulation for perfect Toxin prevention programme

It is a unique multi-functional product
(Mold inhibitor + toxin binder + feed sanitizer)

Diatomaceous earth : It is highly porous clay derived from fossilized algae which has maximum absorbing capacity of humidity and toxins irreversibly.

Organic acids : Buffered Organic acids are incorporated in required quantities to provide a synergetic effect. This effectively kills moulds and pathogenic bacteria and arrests toxins formation in feed.

Paraformaldehyde : It kills fungi and pathogenic bacteria present in feed which helps in feed sterilization and mould killing, thereby protects birds from their ill effects.

MOS :

MOS is incorporated in required quantities which helps in-

- Irreversibly binds and adsorbs multiple toxins.
- Feed sterilization by killing pathogenic bacteria in feed.
- Helps in improving immunity and gut health.
- Modulates intestinal mucosa and microbiota.

Toxin deactivator :

Yeast enzymes transforms mycotoxins into non-toxic metabolites.

High Phytochemical Actives :

- Helps in mobilizing fat in the liver due to damage caused by toxins.
- Helps in restoring liver Function.

Sinamaldehyde :

It acts as antimicrobial, antioxidant and immunity boosting compound.

COMPOSITION:

Toxin binder provides-

- Diatomaceous earth
- Combination of organic acids
- Para formaldehyde
- MOS
- Phytochemical actives
- Sinamaldehyde
- Anti-Caking agent

BENEFITS :

- Control all types of mycotoxins.
- Feed sterilization by killing pathogenic bacteria in feed.
- Stimulate gut-associated systemic immunity.
- Inhibit pathogenic cell multiplication.
- Restore liver function.
- Mobilizing fat in the liver.
- Bind excess moisture and prevent formation of lumps.

DOSAGE :

Broilers / Layers / Breeders: 1 kg / ton of feed

PACKING : 25 kg
