

Ayudine 1.8

The 4x Killer

From one molecule of Iodophor four Biocides are released which kills Pathogenic microorganism effectively at a wide range of pH (2-12)

PRESENTATION: 1 & 5 ltrs.

The Time Tested All Purpose Solution

COMPOSITION: Each litre contains 1.8% w/v Titrable IODINE as stable complex.

AYUDINE 1.8 PURPOSE & BENEFITS:

- Fast acting solution.
- Highly acidic therefore ideal for hatchery use.
- Removes biofilms.
- Strongly soluble in water therefore has long lasting effect which reduces the chances of cross contamination or recontamination.
- Broad spectrum, safe product.
- Do not form THM (Trihalomethane) & HAA (Haloacetic Acid).
- Less pH dependent (2-12).
- Low corrosion potential.
- Retains efficacy in hard water.

IODINE IS BETTER THAN CHLORINE.

- Cost of medication with Ayudine-1.8 < cost of NADCC + water acidifier.
(NADCC requires acidic pH to release chlorine. In neutral & alkaline pH only 10-15% of Chlorine is released from NADCC)

DOSAGE:

- Water cleaner : 1 ml / 10 ltrs of water.
- Hand cleaning : 4-8 ml / ltr of water.
- Egg cleaning : 4-8 ml / ltr of water.
- Spraying in presence of birds : 4-8 ml / ltr of water.
- Cleaning of feeder troughs : 8-10 ml / ltr of water.
- A.I. tips / funnel cleaning & disinfection : 8-10 ml / ltr of water.
- General surface clean-out : 8-10 ml / ltr of water.
