

Safai-ALK

Safai-ALK provides better and economical cleaning compared to generally used cleaner and washing powder.

PRESENTATION : 1 & 5 Ltrs.

Alkaline cleaner with sanitizer

COMPOSITION:

Safai Alk is concentrated general purpose cleaner. fortified with sanitizer for application in poultry industry.

IMPORTANCE OF CLEANING:

- Organic material protects disease agents.
- Good cleaning process will remove 80% of microbial load present on farm.
- Disinfectant present in safai alk makes pathogenic microbes present in organic matter less effective.

SAFAI ALK MODE OF ACTION:

Wetting – decrease surface tension.

Dispersing – splits up dirt particles.

Emulsifying – splits and suspends oil & fat, faeces etc.

Suspending – floats and carries away dirt particles.

Sequestering – dissolves salts.

Sanitizer – reduces microbial load.

SAFAI ALK PURPOSE & BENEFITS:

- Safai Alk assures better cleaning of area & also reduces microbial load because of sanitizer added in it.
- Help in better disinfection.
- Completely removes both organic and inorganic dirt, grime, grease, protein and fatty acids, faeces etc.
- The antimicrobial activity of sanitizer added in Safai Alk increases multifold because of increase contact time.
- Safe for all wettable surfaces.
- Works well in hot or cold water.
- Compatible with Phenolic, quaternary ammonium compound, halogenated and peroxide disinfectants.
- Very useful in high soil load, porous surface & hard water
- Biodegradable.

DOSAGE: 8-24 ml / 10 Ltrs. of water.

General cleaning of premises:

Floors, walls, tiles, bins, transportation vehicles etc.

Cleaning of incubators trays, trolleys and hatching trays:

Pre-soak trays for at least 20 min in safai Alk. Rinse with water, and apply a final disinfection dilution.

Immersion cleaning of equipments:

Prepare solution in tank/ soak items for 10-15 min/ scrub to clean and rinse with clean water.
