

PAINTING RECIPROCATORS

Electro- Mechanical, Servo Driven

- Available up to 4 meter vertical stroke lengths.
- Sleeplessly variable speed range up to 1.1meters/second *
(* Higher speeds available on request)
- Low friction advanced linear bearing slides for carriage.
- Timer belts for noise free, lubrication free long life operation.

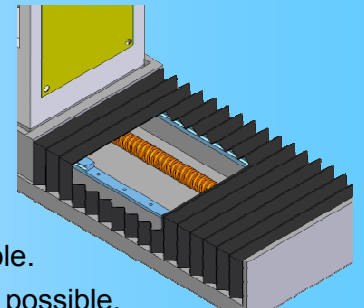

Servo Drive

- Smoothest movement
(Constant torque at any speed.)
- Precise speed control.
- Instant stroke changeover as well as brake.
- Positional accuracy:- Integrated encoder for precise reciprocation stroke as well as spray stroke.
- Closed loop speed/stroke control possible

'PLC' based control

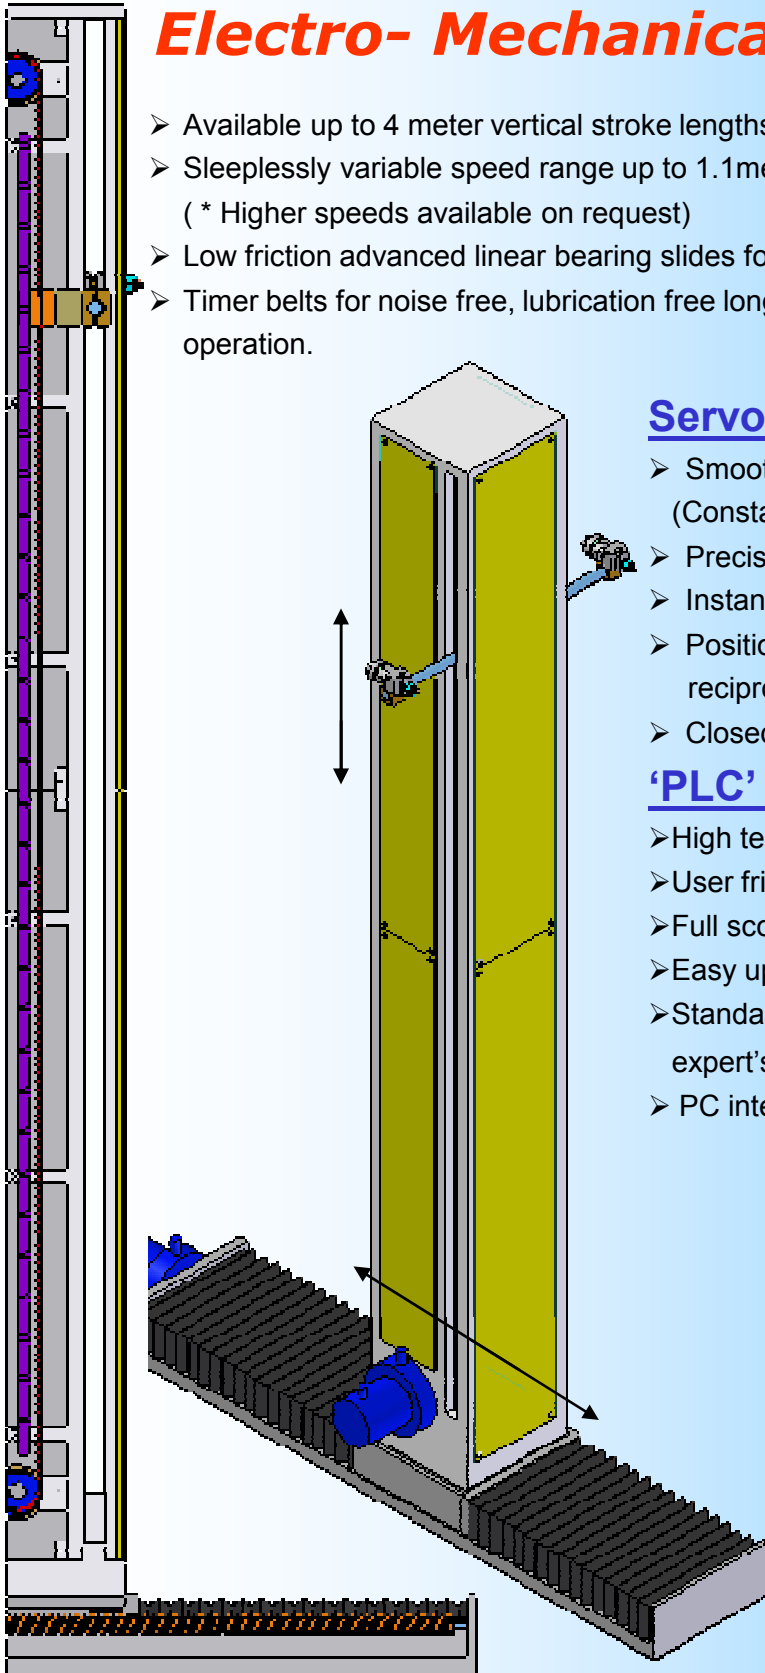

- High tech Precision control.
- User friendly interface.
- Full scope for customization.
- Easy up-gradation possible.
- Standard technology, Local expert's support easily available.
- PC interface through SCADA possible.

Traversing Carriage

- Horizontal Stroke up to 4 Meters.
- Extra precision rolled ball screw
- Servo driven with integrated encoder or AC frequency drive with encoder system.
- Belo type protective cover.

Note: This is general catalogue of customized product so all specifications are subject to customization as per final requirement. Customized Pneumatic, Hydraulic reciprocators, Horizontal roof reciprocators are also available.
